LOOKING FOR LONG TE

CAPS is trying to ease the referral process for students who need off-campus care

Average number of students who visit CAPS each year.

Students who are referred out of CAPS to providers in the community, 30 percent of the grand total.

Number of students referred out who are offered a referral coordination appointment for a follow-up.

DTH/JOSÉ VALLE

By Colleen Moir Senior Writer

Thirty percent of students who seek help at UNC's Counseling and Psychological Services are told they can't be treated in-house.

This process, called referring out, exists because resources at CAPS are limited, even though more and more students are seeking help. Students who are referred out are usually dealing with issues that cannot be treated with short-term therapy — a semester or less.

Dr. Allen O'Barr, the director of CAPS, said he wishes his office could do more.

"Every therapist who works here would love to do long-term therapy," O'Barr said. "We go to school for that, so we want to do that, but our first objective that we can't let go is seeing people as they walk in, to make sure that they're not having to wait weeks for an appointment."

Until 2008, CAPS offered full sessions for students' first appointments. Walk-in hours replaced this practice because O'Barr said people were waiting several weeks for an appointment, which CAPS administrators didn't feel was immediate enough to meet student needs.

Students can walk into CAPS during specified hours Monday through

Friday and be seen without an appointment for triage. Some students walk out of this appointment with only a paper list of off-campus providers and no follow-up.

O'Barr said he understands the process can be frustrating for students who are turned away.

"They get up so much courage to come here, and then they say, 'You're referring me out. Are you kidding

O'Barr said a lot of frustration comes from a misunderstanding of what CAPS does.

"We don't have a session limit, but we don't do anything other than brief psychotherapy," O'Barr said.

"We're mainly focused on getting you over the hump that you're currently in and moving forward."

O'Barr said he doesn't know of any college or university that offers long-term therapy to its students.

He said CAPS is trying to improve by implementing referral coordination, a service that 50 percent of students who are referred out receive. Referral coordinators call community therapists with students present and help them connect.

When students call these off-campus contacts, there's no guarantee the therapists on the list will have room in their schedule to see them.

Lou Lipsitz, a psychotherapist in

Chapel Hill, said he sees one UNC student, but he said he has received calls from several more students asking for appointments.

But Lipsitz said he has a full schedule, meaning he has to choose which clients to see.

"I take cases I'm interested in and where I think I can be helpful," Lipsitz said. "There are some people who may have issues who I might not be able to see. They might need a therapist with different experience than I have."

Student Body President Bradley Opere said it's important to consider the strides CAPS has made recently,

C has high hopes for industrial hemp

Cultivation has been delayed due to the lack of a commission.

By Benjamin Albano

A newly organized association is seeking private fundraising to allow farmers in the state to produce industrial hemp.

The N.C. Industrial Hemp Association hopes to use money raised to create a commission for regulation and permitting procedures that will allow farmers to finally cultivate the crop.

The North Carolina legislature voted to legalize the production of industrial hemp in September. Now, seven months after this decision, members of the N.C. Industrial Hemp Association hope to kickstart production of the crop in the state.

Different from marijuana

Industrial hemp, or Cannabis sativa, lacks the potent chemical most identified with the mind-altering effects of marijuana, which is

derived from THC.

According to the association, sativa typically contains less than one percent of THC.

A low-information crop

Jeffrey Cartonia, executive director of the association, said the common misconception surrounding the differences between industrial hemp and marijuana can be attributed to the plant's history.

"I think there's an education process, which is very simple, once you talk to somebody and actually discuss what each variant is and what the differences are," Cartonia

Before it was controversial, the cultivation of hemp was encouraged during World War

A film titled "Hemp for Victory," encouraged farmers to grow as much hemp as possible to make things such as rope and cloth to contribute to the war effort.

Despite efforts to increase the production of industrial hemp, the Controlled

The leaders were met with protest from **Chapel Hill residents.**

By Nicole Gonzalez Staff Writer

Chapel Hill residents and human rights advocates gathered at Chapel Hill Town Hall Monday to protest the town council's meeting with four newly elected Israeli leaders.

Protestors sat in the audience, mumbling under their breath in reaction to the Israeli politicians' statements.

"They don't want to acknowledge that the occupation is illegal," said Miriam Thompson, a Chapel Hill resident and spokesperson for the Abrahamic Initiative on the Middle East.

Many residents sent emails to the town council, asking them to cancel the meeting with the international visitors.

"If we're going to call ourselves inclusive, that means

The mayor and members of the Chapel Hill Town Council met with four newly elected Israeli leaders. Protestors were in attendance.

everyone," Chapel Hill Mayor Pam Hemminger said.

Thompson said the Israeli occupation of Palestine in the West Bank will destroy Israel.

"They believe in expunging all Palestinians in Israel," Thompson said. "They don't want to acknowledge that in one year alone they've demolished 18,000 homes."

Thompson compiled a fact sheet for the meeting, citing Amnesty International and No Way to Treat a Child, a campaign to stop the detention of Palestinian children. She said the Israeli military is detaining, abusing and torturing Palestinian children.

Openly gay LGBT activist occupies vacancy in NC House

Chris Sgro is currently the state's only openly gay legislator.

By Shweta Mishra Senior Writer

Guilford County Democrats elected an LGBT rights leader Saturday to fill a vacancy left in the N.C. legislature with the March death of House Rep. Ralph Johnson, D-Guilford.

Chris Sgro, executive director of Equality NC, will be the sole openly gay legislator in the N.C. General Assembly – its third ever. Johnson's primary successor, the Rev. Amos Quick, will replace Sgro in January 2017.

Sgro said LGBT representation is vital, especially amid controversy surrounding House Bill 2.

"We would never endeavor to have a conversation about reproductive justice without female legislators, and we should not endeavor to have conversations about voting rights without people of color at the legislature, and we cannot have conversations about legislation that will impact the LGBT community with-

out LGBT members," he said. Former Chapel Hill Mayor Mark Kleinschmidt said an LGBT voice would broaden the

congressional conversation. "The presence of an openly LGBT person in a legislature

Chris Sgro is executive director of Equality NC and was appointed to the N.C. General Assembly.

even one — can't be overstated, so thinking about it as a purely symbolic action is wrong," he said.

"I know members of legislature have a much harder time vilifying and expressing their bigotry in the face of a person they're discriminating against, so I think it's deeply important."

Sgro's appointment followed an organic election process among precinct chair-

persons and vice chairpersons and elected and party officials, said Myra Slone, chairperson of the Guilford County Democratic Party.

His contender, the Rev. T. Anthony Spearman, also backed LGBT rights and reflected the district's tradition of African-American representation, Slone said. But

he didn't campaign as long. Sgro campaigned around social justice.

"I had multiple conversations with the members of the **Guilford County Democratic** Party about the potential for them in this unique place and time to send an out LGBT person for the short session when we certainly hope to be debating the repeal of House Bill 2."

But Sgro's legislative impact will be limited since his brief tenure will not tip the Democrat-Republican ratio, said Ferrel Guillory, a UNC journalism professor and director of the UNC's Program on Public Life.

"In that sense, it is more symbolic than a shift in the political calculus. In terms of the votes available for changing the law or repealing the law, that doesn't change," he said.

Guillory said Democrats will face an uphill battle.

"The first instinct of the Republican majority will not be to repeal the law that they just enacted. The legislators, the people outside the legislature who want the law repealed, will have to get

votes from legislators who voted to enact the law in the first place," he said.

Sgro will remain at Equality NC, which is one of several groups launching a lawsuit against Gov. Pat McCrory over House Bill 2.

"In my particular role, I will continue to be an effective advocate with Equality North Carolina as we talk about the deep harms done to members of the transgender community, the damage that's being done to the economy of North Carolina and the broad impacts of (House Bill 2) as it pertains to employment claims on the basis of race or gender in state court," he said.

Jealous: Racism affects everyone

Former NAACP leader discussed House Bill 2, too

By Jack Davis Staff Writer

Ben Jealous, former president and CEO of the NAACP, told his Memorial Hall audience it's important to remember race is a topic that doesn't only affect certain populations.

The Campus Y and student government worked together to plan Monday's lecture, which was a component of the 50th anniversary of UNC's Speaker Ban Law.

Campus Y Co-President Lauren Eaves said the Campus Y brought Jealous to campus because of his work on race in America.

"We wanted to bring a high-profile speaker to talk about race and racism and how we as students ... are questioning the system and want to dismantle the system," she said. "I think Jealous posed a very specific way of doing that."

Jealous touched on issues of race, racial profiling and institutional racism in America, but he also addressed issues closer to home, such as House Bill 2. Jealous expressed his distaste for the bill and said his brother is transgender.

"It's anti-civil rights. It's anti-legal rights," he said.

"Let's be clear — this bill not only attacks the rights of LGBTQ people," he said. "When you dig into the bill you see a Trojan horse for a much broader, anti-civil rights, antihuman rights platform."

Jealous commended Bruce Springsteen, Tim Cook and other national figures who have taken action to oppose the bill. He also called on UNC-system President Margaret Spellings to refuse to enforce the legislation.

"I know she's already said she'd enforce it, but every day God gives us the right to reverse course and do the right thing," he said.

Jealous went on to speak about race in a broader context. He said issues of race do not only apply to a certain population.

"We, in our country, have to believe that racism doesn't only affect black folks, brown folks, people of color. It impacts everyone," he said.

DTH/NICHOLAS BAFIA

Ben Jealous speaks about race in Memorial Hall on Monday in an event hosted by the UNC student government executive branch and UNC Campus Y.

As an example, he described how police profiling could affect everyone.

"If you're so focused on finding the white serial killer that you don't realize you have a black serial killer in your midst, people die," Isalous said

"If you think danger only comes in certain conditions, certain colors, certain genders,

your police department is wrong."

Jealous also touched on issues of mass incarceration, saying he wanted to address the problem of how states spend money on prisons.

"Over the past 40 years our states have spent more money on prisons than universities," he said. Malik Jabati, a first-year, said he believed Jealous' words articulated several pertinent issues.

"I really enjoyed what he had to say about race and class in America," Jabati said.

"I like how he said we should eliminate adjectives that dispossess and divide our society."

university@dailytarheel.com

Few options when arrested abroad

Schools and the U.S. are limited in what can be done for citizens.

By Tat'yana Berdan Senior Writer

The recent arrest and sentencing of a University of Virginia student in North Korea has raised concern about resources available to students who get in legal trouble abroad.

Otto Frederick Warmbier was sentenced to 15 years hard labor last month for stealing a political banner at his hotel.

"The university remains in close contact with Otto Warmbier's family. We will have no additional comment at this time," said UVa. spokesperson Anthony de Bruyn in an email.

At UNC-Chapel Hill, where 30 percent of undergraduate students study abroad in more than 70 countries, the University's response is limited when a student breaches local law.

"So much depends upon the specifics of the circumstances," said Robert Miles, UNC's associate dean of study abroad and international exchanges.

He said each student studying abroad is expected to attend a pre-departure orientation session that covers important issues related to local laws. They also must sign a contract that acknowledges UNC-CH may be limited in its ability to help.

Victoria Wolf, a foreign service officer in the U.S. Department of State, said the government also operates under constraints depending on specific circumstances.

"If you're arrested, depending on the

"If you're arrested, depending on the country that you're in, some countries may notify us that they have a U.S. citizen in

custody, but often times they don't think to do that," she said.

Wolf said it's important students arrested abroad let local police know they would like the U.S. embassy notified.

"We can't get you out of jail. We are, just as you are as a traveler, working under the same laws as you are in the country," she said.

She said embassy workers are able to provide a list of local English-speaking lawyers and monitor an arrested citizen's trial, as well as see to a citizen's general welfare — including contacting family and raising medical or dental issues with local authorities.

Joseph Kennedy, a professor in the UNC School of Law, said the U.S. government does not offer legal aid to American citizens

"Obviously, American citizens who are detained overseas for political reasons raise different issues which American diplomats sometimes engage," he said.

But Kennedy says it can be difficult to understand when the motivation for arrest is political.

"Countries will usually claim — even countries who are arresting people for political reasons — will claim they are arresting them for violation of their criminal law," he said.

Research prior to traveling is key, Wolf said, because U.S. officials are limited by logistical and security issues.

"Unfortunately, the standard of justice is not universal," Wolf said. "We would love it to be, but it's not and the constitution does not follow you overseas."

state@dailytarheel.com

3 student political groups will meet in Di Phi debate tonight

They'll discuss a wide range of current political issues.

By Rebekah Guin Staff Writer

The Dialectic and Philanthropic Societies, or Di Phi, is looking to bring national issues to the forefront of campus thought at today's Campus Crossfire debate.

The College Republicans, Young Democrats and Young Americans for Liberty will debate issues such as gun control, immigration, criminal justice reform and student loans at 7 p.m. in Gardner Hall room 105. The event will include an open forum for audience questions.

"We wanted to make sure that we were covering everything that students were interested in hearing about, so that is why we are opening it up to the floor," said Tyler Clay, joint senate president of the Dialectic and Philanthropic Societies.

Clay said in addition to the range of topics, Di Phi wanted to make sure there was diversity in the groups represented.

"I wanted to be as inclusive as possible and make sure that all three groups were represented, not just the College Republicans and the Young Democrats," Clay said. "It is going to be harder to structure, but it is going to be a much better debate because of it."

Stormie Baker, president of the Young Americans for Liberty, said she is happy her group is included.

"Our goal is to let people know that there is a third way, an alternative way, to think about recent political conflicts," Baker said. "I think it is easier for millennials to get caught up in the bipartisan monopoly and feel like they have to go one way or the other."

Frank Pray, outgoing chairperson of the College Republicans, said he had similar goals in getting his party's platform out in the open.

"It is a rare occasion where we get to talk about our platform in its entirety," Pray said. "We are hoping to show why our platform is superior to the Democrats' platform in this debate, and, you know, the libertarian platform as well."

Courtney Sams, president of the UNC Young Democrats, said she appreciates how the debate will allow for a more formal means of discussion.

"I'm really excited to see

how each side chooses to represent the huge range of opinions that they're sort of bringing forth," she said.

"It will be nice to sort of wander away from the talking points and get down to honest discussing about what we all believe."

Baker and Pray said they hope students will come learn about a diverse set of ideas.

"We want people to hear us, and if they are curious, we want them to realize that we can achieve a lot of really great things," Baker said. "We always know that people are going to shit on us, but we think that it is worth it to let students and the general public know that there are

other ways to do things."
Pray said the debate can
help everyone educate themselves before Election Day.

"It is going to be a really good opportunity for students to familiarize themselves with the two major parties without having to wade past the rhetoric and the national candidates and actually get to hear the party platforms," Pray said.

Assistant University Editor David Doochin contributed reporting.

university@dailytarheel.com

Q&A with 'Naked and Afraid' contestant Karen Coffee

Karen Coffee, a Chapel Hill resident, was recently a contestant on the Discovery channel show "Naked and Afraid." Coffee spent 21 days on a small island in the Philippines with contestant Matt Alexander from Jennings, La. The episode she

appears in airs on April 17. Staff writer Brooke Fisher spoke with Coffee about her experience on the show and what she learned from being a contestant.

The Daily Tar Heel: Why did you go on "Naked and Afraid"?

Karen Coffee: I grew to appreciate being outdoors and learning how to hunt and fish and be self-sustaining. Fast-forward to November of 2014, my friend texted me, and she was like, "Hey badass friend, do you wanna go on a survival show? I've got a friend who's

in the casting department, and

she's got openings." I'm like, "Hell, yeah!" So I texted her right back.

That's how it exactly started for the "Naked and Afraid" adventure. I had never seen the show before. But it didn't really matter to me whether I had seen the show or not. I just knew that it was my type of thing because it was a teamwork-based thing. This is just one man, one woman, and you have to work as a team to make it work, to survive, and that's totally my gig.

DTH: What's the craziest thing you had to do on the show?

KC: One of the craziest things we had to do, which was completely unexpected: We killed a monitor lizard. There was a humongous monitor lizard that ran through camp. My partner jumped up and thwacked it with a stick, and I had to come in behind with

our machete and sort of get the front end of it and contain it so that we could enjoy it for dinner that evening.

DTH: What were some of the more challenging aspects of filming this kind of show?

KC: To me, on two levels, being naked and being naked.
There are two ways to look at that. You're physically naked, but you're also naked in the way that you're peeling the layers off of yourself. You're becoming raw; you're opening yourself up to the world, really

yourself up to the world, really. Being physically naked was difficult because clothing is shelter. When you strip down to nothing and walk off into the jungle, you've got nothing to start with. Of that, the most difficult part was the feet. I practiced without shoes for two months, even before I knew I

was going to get chosen for the

show. The feet were just awful.

I was hobbling around like I was 90 years old.

And then, the second part of being naked is opening yourself up to the world. (It's) raw emotions, looking inside of yourself and pulling the grit out of yourself to get up and keep going the next day.

DTH: What is one the craziest things that you have done in your life besides the show?

KC: I climbed the side of Machu Picchu. That was pretty crazy. I did that in sort of record time with my brother in 2012. Jumping off the side of a ship in the Galapagos Islands was pretty crazy.

DTH: What was one thing you learned from your experience on the show?

KC: I learned that I have what I thought I had inside of me, personally, to achieve

DTH/JULIA KLEIN

Karen Coffee was recently on the Discovery Channel show "Naked and Afraid," where she spent 21 days in the Philippines.

challenges like this, no matter what age. I do hope that I am an inspiration to folks. Age and gender don't matter; they shouldn't be a barrier to taking on monumental challenges like this.

Really, it comes down to mental fortitude, which I

think is my forte, actually. Everybody has their own strengths, my partner had his own strengths and I have my own strengths. Mine was really keeping us on track mentally.

You can wave goodbye to wind turbines

Beachgoers report unwillingness to rent with visible turbines.

By Kent McDonald Staff Writer

For Annah Bachman, a UNC first-year and Kitty Hawk resident, the Outer Banks are nothing without their views.

She's not alone — at least, not according to a research study co-authored by N.C. State University professor Laura Taylor, which revealed home renters in the Outer Banks would be less likely to return if offshore wind turbines are visible from their homes.

Utility-scale wind farms can have anywhere from 150 to 200 wind turbines, which typically stand 50 stories tall, Taylor said. There are no offshore wind farms in the United States, and there is only one proposal to build one off the coast of Rhode Island.

"I wasn't so sure that the tourism population would be amenable to that kind of change in the ocean view," she said. "And if a turbine farm of that size was built off of one particular beach, they might choose to take their vacation somewhere else."

Taylor said the Outer Banks region — including Bachman's home, Kitty Hawk − is dominated by rental beach homes, which have a lot of repeat visitation and hold significant history for families.

The special thing about Kitty Hawk and the Outer Banks is that, because it's so small, it's extremely difficult to commercialize and industrialize due to lack of space," Bachman said in an email.

She said building offshore wind farms could negatively impact people's enjoyment of the coast.

But the study's results found if a utility-sized wind farm was further than eight miles from the shore, there would be no impact on rental properties, Taylor said.

"However, at five miles from shore, our results indicate folks would require at least a five percent discount on their rental price to be induced to rent at that location," Taylor said.

Zachary Keith, lead organizer for the North Carolina chapter of the Sierra Club a renewable energy advocacy group — said currently the closest any wind farm could be to the North Carolina coast is ten nautical miles, which would not impact property rentals according to Taylor's study.

The North Carolina coastline has one the greatest potentials for offshore winds along the east coast, he said.

Keith said renewable energies like offshore winds can both benefit the economy and environment — creating new jobs, improving health and moving the state away from coal and natural gas.

"Even though renewable energy, offshore wind, is more expensive, when you actually factor in a lot of external costs for fossil fuel combustion from health effects to climate change — the costs are leveling out," he said.

Taylor said while many people support wind energy development in the state, others care deeply about preserving the ocean's beauty.

"While some might support environmental issues and wind energy is a part of that, they also feel that some places are special and should stay special and that, although wind turbine farms are a good cause in some sense, it's spoiling a special place," she said.

COURTESY OF NICOLE D'AVIGNON

Nicole D'Avignon, president of the Carolina Wildlife Information and Science Education club, holds a snake. Carolina WISE is a new club.

New club brings the wild side to campus

The club wants safer encounters with animals.

By Alexis Bell Staff Writer

A new student organization will use reptiles and amphibians to teach people how to properly care for wildlife and nature.

Carolina Wildlife Information and Science Education, or Carolina WISE, plans to bring reptiles and amphibians on campus to educate the local community about how to have safe encounters with wildlife.

"We think it is important for people to know about wildlife and how to act around them, especially if you come across an animal in your backyard," said Nicole D'Avignon, president of Carolina WISE. "If you know

how to act around them, you decrease the amount of injuries to you and the amount of injuries to them, and everyone seems safer and happier."

D'Avignon is a first-year who started planning the organization before coming to UNC. She said she decided to start working on Carolina WISE after hearing about the Robert E. Bryan Fellowship, an APPLES Service-Learning program for projects that serve the community.

D'Avignon said she was inspired to start the group because of a similar program at Malone University in her home state of Ohio.

"I worked at the Columbus Zoo with one of the guys who started Malone's program, so I talked to him, and I talked to their adviser and got to know what their program was and what it entailed, and then I decided to bring it here as well," she said.

The organization plans to keep small reptiles, amphibians and invertebrates in a vacant laboratory on campus and take the animals to local elementary schools.

Members will either take care of the animals while accompanied by trained volunteers or educate elementary school students.

"It's mostly for younger students," D'Avignon said. "But once we are established, we plan on having programs for college students as well. We just want to make sure that we get our main program set up first before we expand."

D'Avignon said the Bryan Fellowship permits the group to request additional funding in the future. Other ways the organization can get money are membership fees, fundraisers or by applying through student government.

"I just want to make sure that they know that we are a

resource for them," said Ben Albert, finance committee chairperson for Student Congress. "If they want to apply for funding, there is no guarantee that they're going to get it, but it is just another resource that is available if their fellowship can't cover everything."

Alana Koontz, a sophomore psychology and media and journalism major, said she would probably have too much going on to join the group, but she has friends who might be interested.

"I am sure there is a niche for that on campus," Koontz said. "There are so many different types of people."

The group will hold an interest meeting today at 6:30 p.m. in the Student Union in Room 3206B. The animals will be on campus by August, and programs will start in October.

Independent bookstores draw readers to local community

By Morgan Howard Staff Writer

Books can take readers to new places — or they can discover them for themselves.

This month, residents can win prizes for visiting independent bookstores located throughout the Piedmont area. The event is sponsored by the Independent Booksellers of Piedmont North Carolina. Flyleaf Books is one of the participating bookstores, said Travis Smith, marketing coordinator for Flyleaf.

"You can drop a chain bookstore anywhere, but an

indie bookstore has to be tailored to the community," Smith said.

The booksellers include The Country Bookshop in Southern Pines, Flyleaf Books in Chapel Hill, McIntyre's Books in Fearrington, Page 158 Books in Wake Forest, Quail Ridge Books in Raleigh, Regulator Bookshop and Letters Bookshop in Durham and Scuppernong Books in Greensboro.

The group started working on the event in February and was inspired by a similar outreach coordinated by another region of independent booksellers.

Land Arnold, owner of Letters Bookshop, said owners of independent bookstores often live in or near the community and have more control over what books come into the shop.

"I think the biggest issue independent bookstores have is people not really knowing they're there and a viable option," Arnold said. "They're a good force for people to realize they can get their literature and community from a local place, and indie stores creates that fabric."

To participate, patrons can

visit each of the bookstores around the Piedmont area to earn a stamp in their Bookstore Field Guide pamphlet.

The prize for four stamps is an Independent Booksellers of Piedmont North Carolina button and a mention on their social media accounts. When participants earn eight stamps, they will receive an Independent Booksellers of Piedmont North Carolina journal, a signed book from a North Carolina author and entry into a drawing for a \$100 gift certificate.

The month-long event will lead up to Independent

BUY A COUCH • FIND A JOB "Farmers need to be comfortable with it," she said.

While Rich said she would welcome industrial hemp farming into Orange County, she also expressed the lack of any federal support or regulation might also be a source of discomfort. Mike Ortosky, an agricul-

tural economic developer for Orange County, said the tradition of hemp in the United States is extensive. "The thing about hemp

that's interesting to me is that it is a traditional agricultural crop. It has been around in the U.S. forever," he said.

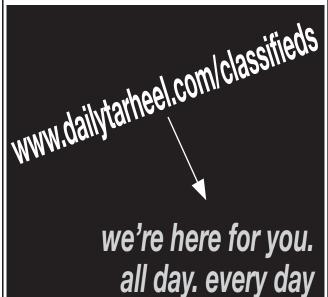

Ortosky said concerns about hemp stem from a lack of confidence in the industry, despite data that shows hemp could be a lucrative addition to the United States' economy.

"It's a cultivation issue. It's a market issue," he said.

"And then when can I count on a market being available?"

Give us our public records

n July 2, 2014, Amanda Albright submitted a public records request to UNC's freshly created public records site. The site's purpose was to "make it easy to request public records and to see how the University's Public Records Office responds."

They're right, it is pretty easy to request public records. And it's simple to find out how the University's Public Records Office has responded.

What's difficult, and completely unacceptable, is the fact that it is so difficult for the public to get a response on a public records request, especially if that request involves emails.

UNC is required by law to release public records. It is not enough to set up a website that makes it easy to submit a request if those records are never released. Every single week, the town of Chapel Hill releases town council members' emails. Those emails are even searchable on their website.

Amanda Albright worked for The Daily Tar Heel as the director of projects and investigations, and she graduated nearly a year ago. Of Amanda's 25 public records requests, 11 are "still pending."

Last year Bradley Saacks was The Daily Tar Heel's university editor. This year, he is our director of enterprise. He submitted his first public ecords request on July 14 2014. That request is still pending, as are 10 of the 47 records he has requested during his time at the DTH.

Bradley graduates in 26 days. They did fulfill one of his $\stackrel{\cdot}{\operatorname{requests}} - \operatorname{Bradley} \operatorname{requested}$ the names of students convicted of sexual assault under the honor court and the sanctions levied against them. Our editor-in-chief at the time, Jennifer Surane, was willing to accept this data in aggregate, with the intention of informing students of their chances of success in these trials.

The University responded with some numbers on the outcome of sexual misconduct cases. But it would not release any further information, citing "federal and state privacy laws" - even though FERPA allows UNC to release the names of persons convicted of sexual assault. Students have a right to know these names.

When I submitted my only public records request to the university, it was with the expectation that I probably wouldn't receive any requested files until years after I

graduate. That is unacceptable. Yes, there has been a huge increase in public records requests since this site has been launched. And it is expensive to fulfill some requests. But UNC spends \$600,000 a year on the staff of the public records office. There are so many ways to make the process more intuitive — like uploading frequently requested documents after they have

been redacted. UNC has an obligation to be transparent with the community, especially on big, emotional issues. The Daily Tar Heel wants to report on these issues. We can't do that with the current system, which keeps journalists from accessing documents which the University is mandated by law to release.

The forgotten: workers

Universities must question how they treat their workers.

tudent organizers at Duke have been pro-**J** testing the racialized abuse of campus workers. We appreciate those students for reminding us the ways power colors the relationships between universities and workers.

As college students, we often conceptualize our university as a triangle: administrators, faculty and students. Workers are oftforgotten in this equation. Yet, the staff — housekeepers, parking attendants, dining hall employees, etc.

- are invaluable in making universities function.

To be clear, we are not calling for valuing them only because of what they bring to the University, but rather because their humanity demands they be treated with respect and dignity, too.

We cannot ignore the racial and socio-economic demographic makeup of workers either. Many workers are low-income, people of color and immigrants. Universities leverage their low societal status as an opportunity to provide low wages and poor benefits.

Situations at Duke remind us of the disparity in power that exists even

in such a localized community. We commend the organizers for advocating for a dismantling of that.

And the situation at Duke could happen here. UNC has been and continues to be complicit in dehumanizing workers by offering low wages and poor benefits and inhibiting their ability to advocate and organize for themselves.

Universities must ask themselves: Are we interested in cultivating a space in which we appreciate and empower the humanity of all of our communities including workers — or will we sacrifice our ethics in supporting the university machine?

EDITORIAL

A classy move

Students need to thank educators who helped them.

7 ith the four years undergraduates study at UNC and the thousands of dollars they, their parents, the state and the federal government have put up for them to do so, one would hope an educator or two made an impact.

Ideally, those educators introduced you to new ways of being in the world, methods of solving small and large problems and the ability to pose new and hard questions of your surroundings and those in power over them and you. At the very least, those educators made your writing better, gave you a job skill or two and knocked you down to build you up a bit.

As many at UNC get ready to graduate, you owe it to yourselves and your best educators to reconnect. Educators suffer crises of confidence more often than you realize. A kind word saving they helped you means the world.

It is also a potentially beneficial one.

Recommendations are the lubricant that

allows entry into further portals of institutional life. Educators are much more likely to give you a standout recommendation if you spoke in class and did your homework.

But if you come back well before a last-minute recommendation is needed and tell educators what your plans are, how they influenced them and how they can help, they are usually more than willing to oblige. Let's be honest with ourselves: A little goodnatured brown-nosing likely is a part of how you got in here. A little more on the way out can't hurt.

ADVICE COLUMN

You Asked for It

In which we rack up University and face toner costs

Kelsey Weekman (Dr Pepper with vanilla and a splash of peach Fanta) and Drew Goins (water with lemon) are the writers of UNC's premier (only!) satirical advice column. Results may vary.

You: What should I do with all the extra CCI printing money I have left?

You Asked for It: Of the \$40 allotted, you've probably got at least \$10 left - or \$37 ifyou're a senior.

To get rid of that, splurge on color printing in the UL, which costs 30 cents per page, or 3-D printing in Wilson Labs, which costs 80 cents per synthetic heart valve.

Type up and print anything you'd usually quickly scribble by hand, like reminders, grocery lists and, again, any and all term papers if you're a senior.

Print festive end-of-theyear decorations for your room, like graduation cap cut-outs or the screenplay of

Drew Goins and Kelsey Weekman

Senior writer and online managing editor. **Submit your questions:** bit.ly/dthyafi

"High School Musical 2."

If you have one of those friends who dillydallied on getting bar golf wristbands, and now you have to start drinking at, like, the makeyour-own Coke machine at Noodles & Company, run to Davis to color photocopy someone else's wristband.

You: I need a makeover. How do I best glamorize the deeply ordinary look I was born with?

YAFI: Get a haircut that frames your head shape. If you have a horse face, grow out your mane. If you have a potato head, shave it and plop a hat on. If you have a Chia Pet face, give scissors to an elementary schooler and see what happens.

Contour your face to have cheekbones like Kelsey, a butt chin like Drew or a third eye like any children they might have. You can also use the contouring stick to draw a turtle on your cheek so people will be too distracted to see your unibrow.

If you have money to splurge, invest in Kylie Jenner's lip kit, Rob Kardashian's sock kit or Khloe Kardashian's stealing-tweetsfrom-Yahoo-Answers kit. If you're on a budget,

try the Fit Tea Detox or SugarBearHair Vitamins their Instagram doppelgangers and former "Bachelor" contestants

Photoshop is the most powerful weapon in beauty. Remove any blemishes you might have by placing a photo of Jennifer Lawrence's face over yours.

"The silence after the game might have been due to the crazy buzzer beater finish, or it could've been because we were bad fans."

Al, on the UNC fans in Chapel Hill after the championship game

LETTERS TO THE EDITOR

The DTH needs better coverage of GPSF

TO THE EDITOR: It appears that The Daily Tar Heel reporters are not even reading their own newspaper. David

Doochin's coverage of the Graduate and Professional Student Federation lawsuit against the Board of Elections failed to provide even the most meager journalistic due diligence.

Instead of checking the veracity of the comments he received, Doochin relaved inaccurate information without factual contextualization.

In two separate instances, Doochin reported quotations saying that Student Congress failed to pass legislation allowing instant runoff for referenda. Had Doochin read the Feb. 17 issue of The Daily Tar Heel, he would have known that Student Congress did pass a bill allowing the voting method.

The suit filed by GPSF President Dylan Russell sought, in part, to overturn that legislation due to an administrative error. Doochin would have discovered this information had he read the lawsuit.

Some may accuse me of sour grapes for writing this letter, but I support GPSF's use of appropriate legal mechanisms to serve their constituents. What I can't support is journalism that shirks even the most basic investigatory practices. The Daily Tar Heel owes it to students and itself to be better than this.

Marcus, thanks for all you did for UNC

TO THE EDITOR:

Thank you Marcus Paige. I have followed you the past four years. You have shown us what a great athlete and man you have become. The speech you gave giving thanks to Coach Roy Williams brought everyone to tears. You stated that this year was not your greatest year. I beg to differ.

This year was your finest year. Your maturity on and off the court, the way you handle adversity, the way you handle life. It will be hard not watching you play for the Tar Heels next year, but I, along with others, hope you get that chance in the NBA.

We wish you well Marcus. Thanks for all the memories, Mr. Paige. And thank you, Coach Williams. You did a fine job.

> Kristopher Newman Baton Rouge, La.

It is a privilege to call yourself a Tar Heel

If you've gone to school at UNC, historymaking isn't a legend — it's daily life. After

TO THE EDITOR:

all, when your alumni includes the greatest person to basketball — the Jumpman himself — it's mighty hard not to brag. Our entitlement is as much a result of hardearned achievement as it is privilege. This year's basketball season unfolded much like a famed sports film that ended the wrong way. When people ask me what's it's like to be a Tar Heel, the best way to describe it is loyalty. To The Carolina Way. To Dean and Roy. To the names hanging in the rafters. To each other.

Chapel Hill is magical because of the people and places that inhabit it, all of which are temporary.

Nothing is the same when you return: A business has closed, a table has been added to a restaurant, an entire class has moved on, yet our spirits linger like a fine fragrance.

You don't stay in Chapel Hill, but you never leave either.

So I know what's happening inside those guys as they cope with this loss; know that we are all coping, every day we think about the bell, and well, and those sunny afternoons in Thrill City. Marcus, Brice and Joel: Thank you for showing the world exactly what it means to be a Tar Heel. We were not defeated or heated. It's just, nothing ends perfectly. Life is not a movie. We were warriors in blue. And we live to tell the tale.

Pork industry strives to be sustainable

TO THE EDITOR:

The North Carolina pork industry strongly supports renewable energy projects involving hog waste such as the Duke Energy projects you recently highlighted ("Pig waste: It's electric," March 30).

There are a growing number of waste-to-energy projects across the state as a result of the state's renewable energy law, and we hope to see more in the near future.

It's also important to recognize that the pork industry has taken significant steps in the past 20 years to better manage waste and address environmental concerns.

Today, North Carolina hog farmers face some of the nation's toughest environmental regulations, including a moratorium on new hog farms and an annual inspection of every farm to ensure it complies with laws that strictly regulate how waste is managed.

North Carolina hog farmers care deeply about our environment and are committed to taking good care of animals, producing high quality pork products and protecting our natural
